

B-SERIES BC LANDING COLLAR

APPLICATION

B-series BC Landing collar is installed near the bottom of the casing string on which the cement plugs land during the primary cementing operation. B-series Landing Collar allows hydraulic elements of the system to be activated after the ball is dropped and pumped to the ball seat.

- Vertical, directional and horizontal wells.

FEATURES AND BENEFITS

- All internal parts are PDC-drillable.
- B-series BC Landing collar is compatible with Liner Hanger Systems manufactured by BULAT plant.

SUPPLY PACKAGE

- B-series BC Landing collar.
