ENVIRONMENTAL PROTECTION POLICY
«TSS» LLC and «METTOIL» LLC

Priorities:

- control of environmental pollution by regulating emissions into the atmosphere within the permitted limits.
- reduction of production waste;
- rational use of natural and energy resources.

Commitments of «TSS» LLC and «METTOIL» LLC:

- Compliance with the requirements of environmental legislation of the Russian Federation, as well as maximizing the satisfaction of the needs and expectations of stakeholders in ensuring environmental safety.
- Involvement of top management and all personnel in reducing and preventing negative impact on the environment at all stages of the life cycle of the products manufactured and operational processes.
- Systematic work to continuously reduce the level of negative impact from production processes on the environment, even if not required by environmental legislation.
- Development and implementation of measures aimed at preventing environmental pollution in the event of accidents and emergencies.
- Increase of the competence and assigning of responsibilities to personnel in the field of environmental safety.
- Monitoring of compliance with environmental requirements by service providers and product suppliers.
- Transparency and accessibility of information about the activities of «TSS» LLC and «METTOIL» LLC in the field of environmental protection for all stakeholders.

Commitments of the management of «TSS» LLC and «METTOIL» LLC:

- To ensure the development and implementation of environmental protection objectives.
- To allocate the necessary resources for the achievement of the objectives.
- To comply with all the commitments on the environmental protection.
- To continuously improve the environmental management system to enhance environmental performance.
