

M-SERIES ACTIVATION SUB

APPLICATION

M-series activation sub is designed to provide free circulation of the drilling fluid with a subsequent pressure-tight mechanical closing. M-series activation Sub is used in wells with liners of the corresponding size.

- Vertical, directional and horizontal wells.

FEATURES AND BENEFITS

- Tool is designed to be installed in the liner assembly at a target depth.
- Additional operations are not required during RIH.

SUPPLY PACKAGE

- M-series Activation Sub.
